### **DETAILED ACTION**

Applicant's amendments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 4 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Fobiano. Fobiano is cited showing a base 11, side walls 12 with cutouts 17, 18 and a rear wall 13 with hooked extensions 15, 16, 25.

#### ***Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Art Unit: 3637

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moran, Jr. and further in view of the ordinary skill of one versed in the art. Moran is cited showing a casing having a base, sidewalls 16, 20 with cutouts 32 and a rear wall 18 with sloped hooks 30 extending from an angled section 26. Moran's casing is preferably formed from plastic. Moran teaches away from the use of sheet metal. The selection of a well-known material based on its suitability for the intended use is considered an obvious matter of design choice. Here Moran discloses that sheet metal is well known in the art. Therefore it would have been obvious at the time of the invention it would have been obvious for one having an ordinary skill in the art to have modified Moran using of sheet metal to form the mechanical connection an obvious matter of design choice.
